

Adobe Premiere Pro File Set-Up

- 1.) The Premiere Pro "project file" (.prproj) is not a complete self contained file, it only holds the information about your editing decisions, i.e. cuts, transitions, effects, ect. The project file merely points or references to the files that make it up, like the index.html file in webpage construction. **THE ORIGINAL CAPTURED VIDEO IS NOT ALTERED IN ANY WAY BY PREMIERE PRO.**
- 2.) Keep all files (.avi, .wav, .mp3, .prtl, .psd, .ai, ect.) in the same folder. on the **(D:) drive** Once you start editing **DO NOT CHANGE YOUR FILE NAMES.**
- 3.) **BACK-UP ALL FILES AT THE END OF EACH CLASS** on DVD+/- R, or RW, RCD-R, CD-RW or back-up using your own personal storage device.
